

Polishing Compounds

Set the stage for your coatings

Dark colours and the highest standards for the quality of surface finishes make the polishing of coated wood and plastic items a challenge. We have the right products for such applications. Menzerna has been developing and producing polishing compounds for processing highly sensitive wood and plastic coatings for more than 100 years. We know exactly what is required here: ultimate care in the selection of raw materials and innovative development and production processes are the prerequisite for consistent quality and outstanding results.
